Double Act

Fisher & Paykel's ovens are designed with cooking in mind.

This unique double oven has two multifunction ovens. Whereas traditionally the smaller top oven has conventional cooking options only, both ovens in Fisher & Paykel's new models have multifunction cooking features.

Bake or Fan bake; Grill or Fan grill; Fan forced; Warm or Defrost ... not just once, but twice ... given you flexibility and complete control. This is multifunction convenience at its best.

But there is more: the powerful grill goes up to an incredible 3000W in the bottom oven.

There is no need to worry with all this heat however as safety comes first. Thanks to an innovative cooling system of an active vented frame and cooling fan, the doors are always cool to touch whilst telescopic runners allow the trays to slide in and out of the oven safely and effortlessly

Model OB60B77CEX1

Richard Bowe, General Manager UK/Europe comments: "This new double oven is pretty special and cooking will now not only be twice as fast, but also twice as easy and twice as much fun."

The new multifunction double oven is available in Designer Series and Classic Series.
